

To the GI fellows:

Finding a job is a daunting task; I know, I was in your position five years ago. Through careful research and a systematic approach, I was able to find a job I love. I hope you do, too.

Attached is a brochure I created which highlights our thriving practice. I hope you find it informative and interesting.

I also have several videos showcasing our beautiful cities. Please let me know if you would like the videos.

Thank you and good luck on your search!
